

Studies in Economics and Business: Green Economics (Studies in Economics & Business)

Part of a series which aims to reflect the changing face of the economic climate and business world. The books contain the latest information and thinking in their areas. Including economics and business, the books in this series give coverage on individual topics for today's student. The texts are specifically focused to the needs of AS, A level and first year undergraduate students looking for information on particular areas. Studies in Economics and Business builds on the success of the established economics series, Studies in the UK Economy. The books follow the same popular structure and layout of the SUKE series. Individual books reflect the syllabus headings so students know exactly which books they need to study. The series includes a European and global perspective to reflect the changing face of the economic climate. The series includes books covering the business world to give economics and business studies students a wider choice. Each book is accessible in length and in level - ideal for students needing detailed information on specialist subjects.
